Jeffrey D. Southmayd, Esq.
c/o August Radio Fellowship Institute, Inc.
Southmayd & Miller
1220 19th Street, N.W.
Suite 400
Washington, D.C. 20036

Dear Mr. Southmayd:

This letter is in response to the Petition for Rule Making filed on behalf of August Radio Fellowship Institute, Inc. requesting to reserve vacant Channel 272A at Jacksonville, Georgia for noncommercial educational ("NCE") use.

The Commission has revised the standards for reserving an FM channel for NCE use.¹ Under these revised standards, a reservation proponent must demonstrate that it is technically precluded from using a reserved channel and would provide a first and/or second NCE radio service to at least 10 percent of the population within the 1mV/m (60 dBu) contour of its proposed station. This revised reservation policy was later extended to existing vacant FM allotments for which an allocation proceeding was initiated prior to the effective date of these standards.² To implement the revised reservation policy, the Media Bureau opened a filing window to permit interested parties to file petitions for rulemaking in compliance with the revised reservation policy.³

The *Public Notice* opened a filing window permitting interested parties to file a petition for rulemaking in compliance with the revised reservation policy by November 21, 2003. The *Public Notice* stated that the filing deadline would be strictly enforced. As a result, your petition is unacceptable for consideration because it was filed on November 24, 2003.

In view of the above, we are returning your petition for rule making.

Sincerely,

John A. Karousos
Assistant Chief, Audio Division
Media Bureau

Enclosure

IN RE MATTER OF)

AMENDMENT TO SECTION)
73.202(b) OF THE COMMISSION'S)
TABLE OF ALLOTMENTS)

RM-

JACKSONVILLE, GEORGIA)
RESERVATION FOR EDUCATIONAL)
NONCOMMERCIAL USE)

TO: Chief Allocations Branch
Media Division

PETITION FOR RULE MAKING

Augusta Radio Fellowship Institute, Inc. (hereafter "ARFI"), by its undersigned
counsel hereby respectfully requests that the FM Table of Allotments be modified as
follows:

<u>COMMUNITY</u>	<u>CURRENT</u>	<u>PROPOSED</u>
JACKSONVILLE, GA	272	272*

In support of this request the following is submitted for the consideration of the
Commission.

1. The Commission's Public Notice, DA 03-2990, released on September 30,
2003, opened a window for the submission of petitions seeking the noncommercial

educational reservation of certain vacant FM allotments. Among these allotments was the vacant FM channel 272A reservation at Jacksonville, Georgia.

2. Attached hereto as an Engineering Statement is a channel study completed by ARFI's engineering consultant. This demonstrates that there are no reserved band, noncommercial, educational FM channels available for use at Jacksonville, Georgia.

3. The Engineering Statement also shows that if the current FM channel 272 allotment to Jacksonville is designated for noncommercial, educational use, it would provide a first and/or second noncommercial broadcast service to greater than 2,000 persons representing more than 10% of the population in the proposed service area of the station.¹

4. Such a showing meets the requirements found in the *Second Report and Order in the Reexamination of the Comparative Standards for Noncommercial Educational Applicants*, 18 FCC Rcd 6691 (2003) at paragraphs 34-40 for the reallocation of nonreserved band FM channels to noncommercial, educational use. ARFI requests such a noncommercial, educational reservation for the FM channel 272 allocation at Jacksonville, Georgia.

5. ARFI will submit comments in support of this proposal. In the event that this channel is re-allocated for noncommercial, educational use, ARFI will file an application for the utilization thereof, and promptly build and operate a station in the event its application is granted by the Commission.²

¹ This meets the standard contained in the *Second Report And Order*.

² ARFI is the FCC licensee of a number of noncommercial, educational FM stations, and has been found to be qualified to hold noncommercial, educational FM licenses in conformity with the Commission's rules, regulations and policies.

Respectfully submitted,

August Radio Fellowship Institute, Inc.

Engineering Statement
In response to MMB Window Closing November 21, 2003
Providing for Conversion of
Commercial Allotments to Noncommercial Allotments

Jacksonville, GA 272A

Robert Moore
November 19, 2003

Public Notice DA 03-2990¹ and Report and Order 18 FCC Rcd 6691² state that three distinct engineering criteria must be satisfied to qualify an allotment. These must demonstrate 1) need for an additional NCE service, 2) unsuitability of any NCE channel at the site at the proposed city of license and 3) unsuitability of any NCE channel at four points near the edge of the protected contour surrounding the city of license. These will be demonstrated in order.

1) Need for Additional NCE Service – NCE Second Report and Order ¶34

The graphic below illustrates the 60 dBu coverage of existing NCE authorizations (shown in black) that intersect the 60 dBu contour of the proposed allotment when it is evaluated at its allotment site (shown in red). The graphic demonstrates that 29.58% (8,532 out of 28,846 people) of the population covered by the allotment would be newly served with first or second NCE service NCE programming by conversion of the channel to NCE status. Of these 1.91 % would receive their first NCE service (shown in red) and 27.67 % would receive their second NCE service (shown in green). The remaining population (shown in black) is already served by two NCE stations. This coverage significantly exceeds the 10% and 2,000 people specified in the R&O.

2) City of License Site – NCE Second Report and Order ¶35b

The city coordinates are given at <http://www.fcc.gov/mb/audio/bickel/atlas2.html> as JACKSONVILLE, GA Latitude: N 31 48 45 Longitude: W 82 58 44 . A minimum class A facility (0.1 kW at 30 m HAAT) was evaluated at each NCE channel. The entries *IN* and *OUT* represent the incoming and outgoing contour overlap with each specified station, or spacing, as in FMCONT output, is given in km. Only negative results, indicating prohibited contour overlap or spacing violation, are displayed. The existence of even one negative value for a channel shows that that channel is not available at the specified site with the specified facilities. Note that all stations in the CDBS are included here, whether authorized or not, since most, if not all, are included in closed Mx groups, so there is no longer an opportunity for new entrants to file. This table shows that all the NCE channels are unavailable at this site for the specified facility.

3) Cardinal Sites – NCE Second Report and Order ¶35a

Availability was also evaluated at 27 km (28 km class A class contour distance - 1 km) of from the city of license site at azimuths of 0, 90, 180 and 270 degrees. In these evaluations, a class maximum facility was utilized. The entries are interpreted as in 2). These tables show that no NCE channels are available at these sites for the specified facility.

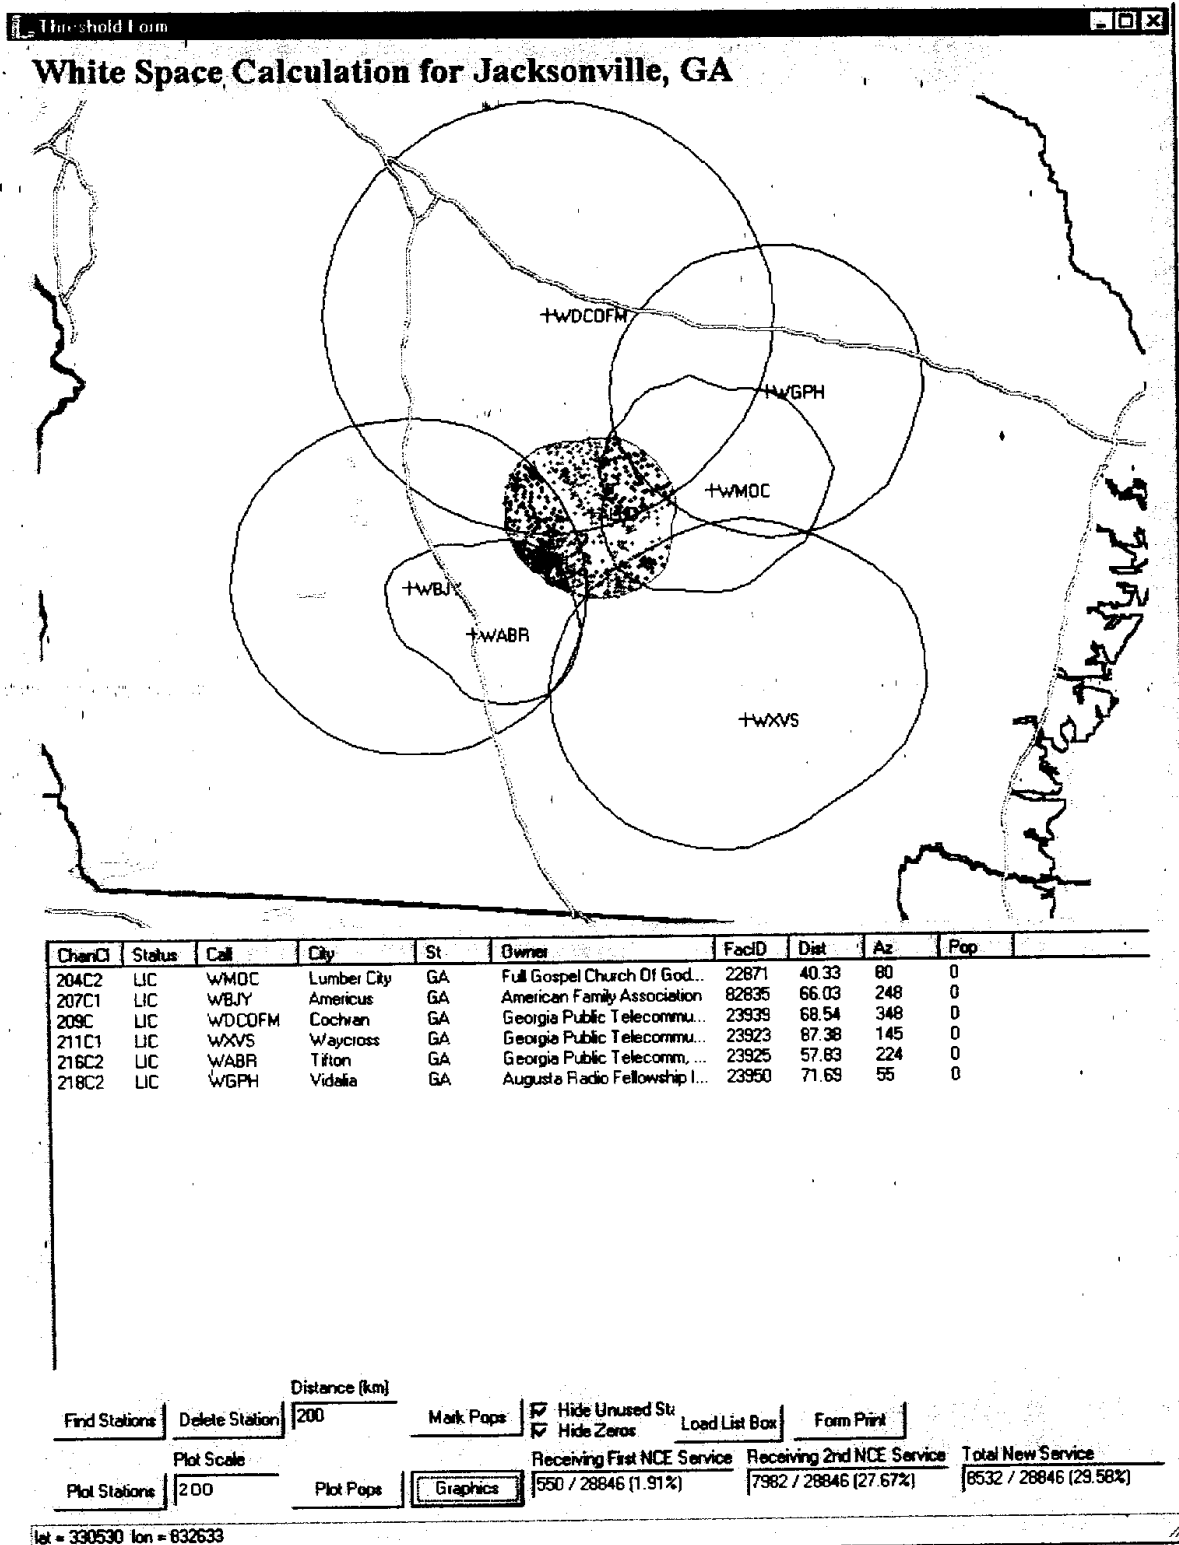

Conclusion:

The criterion specified by the Commission is satisfied by this allocation and it can be considered for conversion to an NCE allocation.

¹ Media Bureau Opens Window to Permit Noncommercial Educational Reservation Showings for Certain Vacant FM Allotments, Public Notice, DA 03-2990 (rel. Sept. 30, 2003) (the "Public Notice").

² Reexamination of the Comparative Standards for Noncommercial Educational Applicants, Second Report and Order, 18 FCC Rcd 6691 (2003) ("NCE Second Report and Order").
